

Bader Bin Abri

Mechanical Engineering · CAD · Web Development

✉ b.binabri@gmail.com  github.com/l01ze  Muscat, Oman

I build mechanical systems, web apps, and automation scripts that work. My process: design with constraints, test with rigor, iterate with speed. Seeking opportunities where I can apply my Fusion 360 and web development skills to solve real engineering problems.

SKILLS

CAD & DESIGN

Fusion 360 Parametric Modeling
3D Printing (FDM)

PROGRAMMING

Python JavaScript HTML/CSS
Git/GitHub

EMBEDDED & AGILE

Arduino Scrum Framework
Systems Thinking

EXPERIENCE

Accounting & Purchases

Nafal

1 Month · 2025

- Managed and tracked purchase orders across multiple vendors, ensuring 100% accuracy in all transactions
- Developed an organized expense monitoring system, reducing reconciliation time by ~30%
- Handled sensitive financial data with discretion and reliability

PROJECTS

Parametric 3-Speed Gearbox

Fusion 360 · Arduino

- Designed complete transmission housing and gear train with optimized shifter linkage
- Applied parametric constraints to gear profiles and shaft spacing for rapid ratio iteration
- Integrated Arduino test rig for throttle simulation

Fusion 360

Parametric

Mechanical

AI Workout Planner Pro

JavaScript · Grok API

- Built weekly workout tracker with AI-generated custom splits on the fly
- Features interactive checklists, 5 theme presets, and live volume metrics

Web App

AI Integration

Responsive UI

🔄 Work in progress

Athena · Multi-Agent AI Studio

Groq API · Client-Side

- Developed client-side multi-agent orchestrator supporting Llama 3.3-70B
- Includes per-agent personality customizer and inline history editing

LLM Orchestration

Groq API

Client-Side

🔄 Work in progress
